Atlantis Word Processor Crack+

Magic Words lets you add special phrases to text, then generate a text document using a range of word changes. It allows you to add, edit and delete phrases in the document. When you change a word that was not added, it immediately replaces the phrase. Thus, you can quickly replace words with hyperlinks, choose the image, name, address and contact details you want to link to, link to another document, etc. With Magic Words, you can select a segment of text, then instantly add a special phrase to that text. For example: - a five-word phrase lets you insert a "Do you have five minutes?" hyperlink to the current page - a nine-word phrase inserts "Join our free webinar" - a phrase that's unique to the current page creates a clickable direct link to that specific page You can create as many phrases as you like. For example, you can name a phrase "Call me" which generates "Call me" as the phone number, "Home is the best place" turns into a hyperlink to your home page, "Join us at the meeting tomorrow" creates a hyperlink to your meeting schedule, "Buy this now!" lets you add a product or a special coupon, and so on. When you're satisfied with the formatting, just press the "Add" button, choose a page where the phrase will be added, then press "Apply" and your new phrase becomes part of the selected text. All you have to do now is choose a word you want to replace that phrase with. For example, if you created a phrase "Buy this now!" and wanted to change it to "Buy now!", click on the word "now!" to replace it with that word, press Apply. Edit phrases: With the help of the "Advanced Mode" button, you can drag a button to a new position or press the Ctrl + Arrow or Ctrl + Shift + Arrow keys to move the selected phrase, a button or a whole block of text. In addition, you can use the "Advanced Mode" button to add small formatting changes such as changing wordcase, adding bold, strikethrough or underline, moving a phrase up or down a line, etc. Creating new phrases: When you add a phrase, you can specify a title, and determine whether or not that phrase should be unique to this document, for this document only, for all documents, for this page only, etc. Magic
